Recommendations To Help You Excel

The following recommendations are to help you get the best and most profitable experience from your use of this software and trading Forex in general.

Please consider following these recommendations as we have reviewed them and utilized them for years successfully – including other hundreds of other traders we work with.

Which Forex Broker Should You Use?

There are 2 brokers we highly recommend. Both are respectable brokers that work well with Easy Money X-Ray Robot and are prompt with withdrawals and offer good support.

The first is Blaze Markets you can find them here: <https://www.blazemarkets.com>

Blaze Markets is a broker created by traders that got tired of dealing with poorly run brokerages. They wanted to create one that supports robot trading with optimal conditions. There are very fast execution speeds and competitive pricing.

Blaze Markets accepts most countries, but not United States based clients. For United States clients, please refer to the next broker recommendation.

The second broker is PAX Forex you can find them here: <https://paxforex.org/?refid=42679F9C-4FE3-42F3-9092-7D1B321722F3>

PAX Forex is a solid broker with good trading conditions, prompt withdrawals, and overall good support. The systems work smoothly and has some solid offers. They accept United States Based clients when using our link above (must use our link - select NA for Country if not in the list).

After signing up with one of our recommended brokers download and install Meta Trader 4, which is provided free by them. (Please choose highest leverage).

Account Type to Use

If you wish to deposit \$100 to \$200 minimum, then please use a CENT account (PaxForex offers cent accounts link above).

If you use Standard or a Pro account, then \$3,000 is the ideal minimum, but you can go down to \$500 - \$100 minimum, which will be an elevated risk, but of course higher return.

Use A VPS and Everything Will Run Even If Your Computer is Off...

You can avoid leaving your computer on and access your platform from any mobile device using a virtual server. We highly recommend using a VPS always for trading.
